Site Prep Checklist

Get your site ready for installation day. Stoots Storage Solutions, Galax, VA

BEFORE YOUR SITE REVIEW

- [ ] Pick a spot for the building, and a backup spot
- [ ] Note slope, soft or wet ground, rock, and where water runs after a hard rain
- [ ] Look up for power lines and overhanging limbs
- [ ] Find property lines or survey pins; ask the county about setbacks
- [ ] Check HOA rules if you have an HOA
- [ ] Mark septic tanks, drain fields and wells; keep the building clear of them
- [ ] Call the county building office about permits and engineered drawings

THE WEEK BEFORE INSTALL

- [ ] Call 811 a few business days before any digging (free)
- [ ] Make sure a large delivery truck can reach the site: gates, low branches, turns, soft ground
- [ ] Clear brush, stumps and debris from the building area plus working room
- [ ] Have an outdoor outlet within reach, or tell us there is none nearby
- [ ] Have your permit posted or ready if your county requires it

INSTALL DAY

- [ ] Site is clear, level and dry
- [ ] Foundation is poured and cured (if you have one); keep vehicles off a new slab
- [ ] Driveway and path to the site are open
- [ ] Vehicles, equipment and materials are moved out of the way
- [ ] Pets are inside; kids are well away from the work area
- [ ] Neighbors know if the truck may block a shared drive
- [ ] Someone is available by phone if the crew has a question
