

SOUTHWEST VIRGINIA · SERVING VA, NC & 28 STATES

Metal Buildings & Concrete, Start to Finish

One company pours the footers, pours the slab and sets your steel building on it. One point of contact, dirt to last screw.

Call or Text 276-235-1191

What We Build

Garages & Workshops

Single-car to multi-bay, roll-up and walk-in doors, windows and insulation options.

Carports & RV Covers

Open carports and taller covers for campers, boats and equipment.

Barndominium Shells

The steel shell and the foundation, ready for your build-out.

Barns & Ag Buildings

Equipment, hay and livestock shelter, with lean-tos for extra cover.

Commercial Buildings

Shops, storage and warehouse space with clear-span framing.

Concrete & Site Prep

Footers below frost depth and 4-inch slabs poured to fit your building.

How It Works

1

Reach out with size, location and use. Photos help.

2

Site review and one quote for building and concrete.

3

We prep the site and pour footers and slab.

4

Building delivered, installed, anchored and checked.

Roof Styles

About 80% of the buildings we install get a vertical roof. Panels run peak to eave, so rain, snow and leaves slide right off. Boxed-eave (horizontal) gives a house-style look at a lower price. Standard (curved) is the most budget-friendly, good for basic carports and covers.

Ways to Pay

Rent-to-Own

15% down. Monthly payments about 25% lower than typical programs. 90 days same as cash from delivery. Open carports not eligible.

Price Lock

A 15% deposit locks your quoted building price until spring. Steel, diesel and freight keep climbing.

Concrete Payments

Quoted separately: 10% of the job at signing (non-refundable), 35% of the remaining balance at the footer pour, 65% at the 4-inch slab pour.

Recent Installs

Why People Trust Us

We work with 4 carefully vetted manufacturers after cutting ties with 53 others over quality and how they treated customers. Family-run, based in Southwest Virginia, and every building is certified for your local wind and snow loads.
